MUHAMMAD SAIM

WEB DEVELOPER

OBJECTIVE

Enthusiastic and detail-oriented web developer with practical experience in developing dynamic and user-friendly e-commerce websites using Laravel. Skilled in creating secure, scalable applications and passionate about full-stack development. Seeking a position in a progressive organization to apply my expertise and grow professionally while contributing to impactful projects.

PROJECT EXPERIENCE

Backend Project:

Bicycle Selling E-commerce Website

Technologies used: Laravel, MySQL, Laravel Breeze, Bootstrap, JavaScript.

Developed a comprehensive e-commerce platform for bicycle sales, featuring seamless cart and checkout processes, flexible shipping options with tracking, and discount management using promo codes. Integrated a wishlist for users to save favorite products, and implemented secure authentication with Laravel Breeze. The platform also includes an admin dashboard for efficient management of product inventory, orders, customers, and shipping logistics.

Frontend Project:

Ephemeral Equilibrium

Technologies used: HTML, CSS, GSAP, JavaScript.

Developed an animated front-end website using GSAP for seamless animations and Locomotive.js for smooth scrolling, showcasing innovative design and functionality.

Harvel Electric

Technologies used: HTML, CSS, JavaScript , JSON.

Designed a front-end for an electric shop website, integrating JSON-based product cards, a category filter, and a product detail modal for enhanced user interaction.
